-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

THE REPLY FILED 19 February 2004 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.

Continuation of 5. does NOT place the application in condition for allowance because: Fisher discloses multiple layers that serve to substantially cancel beams in the forward direction. Each beam that passes through the first layer is cancelled by the next and so on. While applicant argues that Fisher absorbs and does not reflect microwave energy, this is not specifically claimed. Fisher also discloses in column 2, lines 39-48 attentuation reflection of waves. Fisher discloses in Column 1, lines 56-60, a window that is transmissive to light in the form of visible or infrared energy, has low transmissivity to microwave energy in the wavelength ranges of interest and provides microwave reflection in selectable wavelength ranges..

Continuation of 10. Other: Claims 8-9 and 11-14 would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. In addition, Examiner still believes amendment to clarify that no absorption or cancellation without absorption in the claims would make this case in condition for allowance pending further consideration and search.
